PERSONAL PROFILE

AI & Data Science undergraduate with hands-on experience in Machine Learning, Data Analysis, and predictive modeling. Skilled in Python, SQL, Pandas, NumPy, and Scikit-learn, with practical experience developing Weather Prediction, Crop Recommendation, and Movie Recommendation systems. Eager to contribute to innovative AI solutions while continuously enhancing technical skills.

EDUCATION

Matoshri College of Engineering & Research Center, Nashik
B.Tech – Artificial Intelligence & Data Science

CGPA - 7.90
Expected Graduation : 2028

TECHNICAL SKILLS

Languages: Python, SQL

AI/ML: Data Preprocessing, EDA, Feature Engineering, Model Training, Model Evaluation, Generative AI (Basics)

Libraries: Pandas, NumPy, Scikit-learn

Data Visualization: Power BI, Tableau

Tools/Platforms: Jupyter Notebook, VS Code, Git, GitHub, Kaggle.

EXPERIENCE

ARTIFICIAL INTELLIGENCE INTERN

June 2026 - July 2026

Codec Technologies

- Worked on AI/ML-based tasks involving data preprocessing, model building, and analysis, gaining hands-on exposure to real-world machine learning workflows
- Collaborated with the team to apply Python-based ML tools (Pandas, NumPy, Scikit-learn) for solving practical problems.

PROJECT

Weather Data Analysis and Prediction | Python, Pandas, NumPy, Scikit-learn

GitHub: <https://github.com/nishaapt/Weather-Data-Analysis-and-Prediction>

- Developed a machine learning model to analyze and predict weather conditions using historical weather data.
- Performed data preprocessing, exploratory data analysis (EDA), and feature engineering for improved model performance.
- Evaluated prediction accuracy and visualized weather trends using Python libraries.

AI-Based Crop Recommendation System | Python, Scikit-learn, Pandas, NumPy.

- Built a machine learning model to recommend suitable crops based on soil nutrients and weather conditions.
- Processed agricultural datasets using data preprocessing and feature engineering techniques.
- Improved crop recommendations through predictive analytics and machine learning algorithms.

Movie Recommendation System | Python, Pandas, Scikit-learn

GitHub: <https://github.com/nishaapt/movie-recommendation-system>

- Built a personalized movie recommendation system using collaborative and content-based filtering algorithms.
- Processed user ratings and movie metadata to generate accurate movie recommendations.
- Improved user experience by delivering personalized suggestions through similarity-based ranking techniques.

CERTIFICATIONS & ACHIEVEMENTS

GenAI Powered Data Analytics Job Simulation

OCT 2025

- Successfully completed a Generative AI and Data Analytics job simulation program.
- Applied data analysis, visualization, and AI-driven problem-solving techniques to business scenarios.

Selected for Smart India Hackathon (SIH)

NOV 2025

3rd Place – Robo Car Race

APRIL 2026

HOBBIES

- Painting and Creative Design
- Exploring New Places and Cultures
- Reading Books
- Nature Observation
